

Face Mask Sublimation

Especially for sublimation printing

- Put the printout on a flat surface with the printed side up
- Put the soft side of the mask on the printout and fix with heat tape on all four corners of the black border
- Flatten the white fabric with your fingers as much as possible
- Turn the mask/printout over and put it on the heat press
- Press at 180 to 190°C for approx 25 bis 35 seconds
- Peel paper only after mask cooled down
